

**The BOXline is a modular system developed by KOLBUS for versatile and flexible production of luxury packaging**

## **SW.M 400**

### **New technology Magnet inserter SW.M 400**

To make boxes with sophisticated magnetic closures, the magnet inserter automatically mills the blind holes for the magnets, applies the glue and inserts the magnets or steel pills

- No separate hole punching
- No extra label application to hold magnets in place
- No blemishes on box cover caused by magnetic forces
- Flexible positioning
- Toolless adjustment

The KOLBUS magnet inserter processes covered box lids or raw board. Once the magnets have been inserted and the lining applied, the box lids are fed to the SW.G line for automatic finishing.

- The inner tray is positioned on the wrap-around lid by the SW.B
- The flat punched sections are applied by the SW.Z
- Mechanical speed  
up to 40 products a minute

*Net output will depend on the specific product format, material, etc.*
